

**REMARKS**

The foregoing corrects an error in Reference Example 1 at page 18, line 7 where the reference to "anhydride solution" should be "sodium polystyrene sulphonate solution". No new matter is involved as evidenced by the fact that there is no antecedent basis for an "anhydride" solution. Two solutions are referred to in Reference Example 1 at page 18, one of these is the sodium polystyrene sulphonate solution and a solution of melamine in formaldehyde is also mentioned. Perfume A is described in the Example as being added to the "anhydride" solution. The melamine formaldehyde solution is added later on. It is, therefore, clear from the Example that perfume A must be added to the sodium polystyrene sulphonate solution.

Entry of the amendment as correcting an obvious error is requested.

Respectfully submitted,

MORGAN LEWIS & BOCKIUS LLP
